

3rd Newsletter of E-MPROVER Project

During November 30, December 1, 2 and 3, the training course for the E-mprover project was held in Perugia (Italy), which brought together 12 youth workers specialized in the area of entrepreneurship, to validate the contents that have been created in this project, and so that, in the coming months, they will implement this knowledge to active young people in disadvantaged situations.

Participants from Infolog (Italy), IED (Greece), SEP (Romania) and Inercia Digital (Spain) have attended this course. As a youth worker for Inercia Digital. It has been a pleasure to collaborate with them on the project as they bring great value as experts in this field.

Three modules have been worked on in the course: "How to plan an online business", "How to manage an online business" and "Use of ICTs to promote a business and sell on the web". An online digital education platform has also been created where these contents have been integrated, which will be available as open resources in June 2022, at the end of the project.

E-MPROVER PROJECT ACTIVITIES, INCLUDE:

The development of the E-MPROVER kit, which is made up of 3 modules ("How to plan an online business", "How to manage an online business", "Use of ICTs to promote and sell on the Internet"), and is available through the e-learning platform. The platform provides open access to trainees and youth workers who wish to use the material and will also function as a facilitator to deliver the training through the Virtual Online Training Tutorial.

After each module, each young person will find a final questionnaire where they can validate the knowledge acquired, then with the three final questionnaires after each module it will be possible to conclude that the training course is finished.

3rd Newsletter of E-MPROVER Project

Project's partners from Romania, Italy, Spain and Greece work together in order to:

- ❖ Develop the skills of youth workers through transnational learning and sharing best practices for using E-MPROVER in youth training activities to initiate an online business.
- ❖ Improve the skills of young people with reduced opportunities by using the E-MPROVER training program to guide them in initiating and managing an online business.
- ❖ Develop a European-wide network of organizations that use and promote E-MPROVER to stimulate young people to start an online business.

THE PARTNERSHIP

The training course was held in Perugia, Italy, in December 2021 organized by Infolog. The partners discussed the project and validated the contents already created, modifying the last details so that the young people absorb all the knowledge.
