

4th Newsletter of E-MPROVER Project

The “E-MPROVER” project, was officially launched in December 2019 and June 2022 was the last month of its implementation. The consortium of four partner organizations (SEP, Infolog, Inercia Digital and IED) cooperated throughout these years, in realizing the outputs and objectives of the E-mprover project.

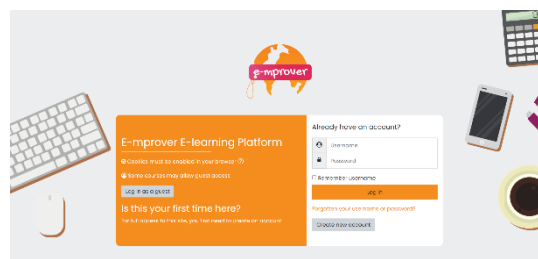

PROJECT OUTPUTS

The intellectual output will be the E-MPROVER kit that will consist of 3 modules, an e-learning platform and an Online Training Virtual Tutorial. The platform will provide open access to trainees and youth workers who wish to use the material, an instrument, at the same time, via which the training will be provided. The 3 theoretical modules will focus on the following topics:

- How to plan an online business**
THEORETICAL PART
Methodological Part
- How to manage an online business**
THEORETICAL PART
Methodological Part
- Using ICTs to promote business**
THEORETICAL PART
Methodological Part

The E-mprover project has been successful in contributing to the social inclusion of young people with fewer opportunities through the development of competencies in the field of web entrepreneurship. The modules included in the E-MPROVER kit, available in different languages (English, Romanian, Italian, Greek, and Spanish), can be accessed online through the project’s website <https://emproverproject.eu/>.

In the framework of the project, [a platform](#) has been developed, addressed to young people and youth workers interested in learning/teaching online entrepreneurship. Open access to the platform is offered, with quick and easy registration and the use of it will be guided by the Online Training Virtual Tutorial.

As for the partners, they have gained new skills and knowledge, such as the understanding of the needs of people with fewer opportunities regarding entrepreneurship, as well as the means and methods to learn/teach online entrepreneurship. The partners with the knowledge gained through the project are now more capable to provide training through the new methodology developed under the project.

Throughout the last months of the implementation period of the project, apart from the finalization of the outputs, partners realized the learning activity in Perugia bringing together 12 youth workers specializing in entrepreneurship, the last transnational meeting in May 2022, in Huelva, Spain, the workshops with young people with fewer opportunities age 17-25, and finally the multiplier events in each partner country to disseminate the objectives of the project in a national level.

THE PARTNERSHIP
